## **DETAILED ACTION**

### ***Response to Amendment***

The Amendment, filed on February 8, 2006, has been entered and acknowledged by the Examiner.

Cancellation of claims 7-10 has been entered.

Claims 1-6 are pending in the instant application.

### ***Allowable Subject Matter***

Claims 1-6 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 1, and specifically comprising the limitation of a metal plate covered with an insulating layer, and fixed onto an inner surface of the first substrate by the electrode protective layer, and having a plurality of formed-for-unit-light-emission-area through holes formed in a matrix arrangement in a portion of the metal plate opposite a display area portion of the first substrate for formation of unit light emission areas, and burning-process-use through holes formed in a portion of the metal plate opposite a non-display area portion of the first substrate to function in a burning process, wherein the metal plate is fixed in the display area portion and the non-display area portion of the first substrate by the electrode protective layer.

Regarding claims 2-4, claims 2-4 are allowable for the reasons given in claim 1 because of their dependency status from claim 1.

Regarding claim 5, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 5, and specifically comprising the limitation of

Art Unit: 2879

a metal plate covered with an insulating layer and having a plurality of formed-for-unit- light-emission-area through holes formed in a matrix arrangement in a portion opposite a display area portion of the first substrate for formation of unit light emission areas, and burning-process-use through holes formed in a portion opposite a non-display area portion of the first substrate to function in a burning process, and burning the first substrate, having the metal plate arranged thereon, to fix the metal plate onto the first substrate by the electrode protective layer in the display area portion and the non-display area portion of the first substrate.

Regarding claim 6, claim 6 is allowable for the reasons given in claim 5 because of its dependency status from claim 5.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
